

ThinkPad P16 Gen 3

Designed for advanced business professionals, this Intel®-powered workstation combines cutting-edge performance in a sleek, durable design. Equipped with the latest Intel® HX Series Core Ultra 5 / 7 / 9 Processor (Series 2), it delivers exceptional multi-core performance for demanding workloads. Supporting up to 192GB of high-speed SO-DIMM DDR5-5600 memory, the system ensures seamless multitasking and accelerated data processing. Encased in a premium aluminum chassis with a refined top and bottom finish, the new design offers both durability and a professional aesthetic.

The 16" Tandem OLED display with optional 3.2K resolution and a stunning 100,000:1 contrast ratio delivers ultra-crisp visuals, lifelike colors, and deep blacks, ideal for professionals working with design, data visualization, or high-impact presentations. Paired with the optional Lenovo® Yoga® Pen, it enables seamless sketching and note-taking, while the optional Add-on Film Touch provides enhanced interactivity for a responsive touch experience.

The discrete NVIDIA® RTX PRO 1000, 2000, 3000, 4000, and 5000 Blackwell Generation GPUs accelerate parallel processing tasks, enabling faster calculations and smoother handling of massive datasets. These GPUs enhance performance in applications like R, Python, SAS, and MATLAB by offloading computations from the CPU, reducing wait times for modeling, forecasting, and simulations.

Configured with up to three M.2 2280 Gen 5 performance SSDs with up to 12TB (4TB each), ensures ultra-fast data transfer rates, enabling seamless multitasking, delivering smoother performance, quicker rendering, and future-proof efficiency, ideal for creative professionals.
